MOHSIN MANDLIK

AI Engineer | Generative AI | LLMs | Agentic AI | Python

Bengaluru, Karnataka | +91 6360200169 | mohsinmandlik@yahoo.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI Engineer / Generative AI Engineer building LLM-powered applications and agentic AI workflows in Python with Google Gemini and the OpenAI API. Hands-on with prompt engineering, function/tool calling, structured JSON outputs, n8n AI Agent workflows, and webhook-driven REST API integrations, with full-stack experience in FastAPI/Flask, Node.js, Next.js, and PostgreSQL. Working knowledge of RAG, embeddings, vector search, LangChain, LangGraph, MCP, LLM evaluation, AWS, and Docker.

TECHNICAL SKILLS

Generative AI & LLMs: Generative AI, Large Language Models (LLMs), LLM Applications, Prompt Engineering, Context Engineering, Structured JSON Outputs, Function Calling, Tool Calling, OpenAI API, Google Gemini, Hugging Face, Qwen, Ollama

AI Agents & Orchestration: Agentic AI, AI Agents, Multi-Agent Systems, LLM Orchestration, MCP (Model Context Protocol), LangChain, LangGraph, LlamaIndex, Tool Orchestration

RAG & Retrieval (Working Knowledge): Retrieval-Augmented Generation (RAG), Embeddings, Vector Databases, Vector Search, Semantic Search, Chunking, Document Processing, Reranking, Metadata Filtering, Hybrid Search

LLM Evaluation (Working Knowledge): LLM Evaluation, RAG Evaluation, Prompt Evaluation, Hallucination Detection, AI Guardrails, Observability, LLMOps

AI Automation: n8n, AI Workflow Automation, AI Agent Workflows, AI Chatbots, REST APIs, Webhooks, API Integration

Backend & APIs: Python, FastAPI, Flask, Node.js, Express.js

Cloud & DevOps: AWS (EC2, S3, ECS, RDS), Docker, Git, GitHub, Postman

Databases: PostgreSQL, MySQL, MongoDB

Frontend: Next.js, React.js, TypeScript, JavaScript, Tailwind CSS

Supporting NLP / ML: Sentence Transformers, PyTorch, XGBoost, OpenCV, MediaPipe

PROFESSIONAL EXPERIENCE

AI Automation Specialist Intern | MKGlobo Solutions March 2026 – September 2026

- Integrated Google Gemini LLM into agentic AI workflows using n8n's AI Agent and Chat Model nodes for LLM-driven decision-making.
- Built webhook-triggered REST API integration pipelines in n8n to automate multi-step business processes end-to-end.
- Designed and optimized prompts for LLM-powered chatbot and content-generation workflows for marketing and lead management.
- Collaborated with developers, designers, and marketing teams to translate business requirements into AI solutions.

AI Automation Specialist | Freelance – MKGlobo Solutions September 2026 – Present (Project-based)

- Deliver agentic AI and workflow-automation solutions for client projects, building custom n8n pipelines powered by Google Gemini.
- Design prompt-engineered LLM workflows and build webhook-triggered REST API integrations tailored to each client.

PROJECTS

BusinessLens AI — Agentic AI-Powered Business Intelligence Platform

- Architected a multi-stage agentic AI pipeline in n8n covering business intake, research planning, data aggregation, competitor benchmarking, SWOT analysis, and recommendation generation.
- Integrated Google Gemini via n8n's AI Agent and Chat Model nodes, with webhook-triggered orchestration connecting the workflow to the application backend.
- Built a Next.js/React analytics dashboard surfacing Business Health Scores, SWOT analysis, and AI-generated recommendations.

Tech Stack: Next.js, React.js, Node.js, TypeScript, Python, Google Gemini, n8n, PostgreSQL, Tailwind CSS, Git

Repeated Question Detection — NLP Application

- Built an NLP application that identifies semantically similar questions across historical question papers using Sentence Transformers embeddings, delivered via Streamlit and Flask.

Tech Stack: Python, Sentence Transformers, PyTorch, XGBoost, Streamlit, Flask

ResQFood — Food Redistribution Platform

- Developed a full-stack platform connecting restaurants with NGOs, with donor and NGO dashboards, REST APIs on MySQL, and real-time food tracking (Socket.io).

Tech Stack: React.js, Node.js, Express.js, MySQL, Socket.io, Git

EDUCATION

Master of Computer Applications (MCA), KLE Technological University 2024 – 2026

Bachelor of Computer Applications (BCA), Karnataka University Dharwad 2022 – 2024
